**FOOTNOTES:**
1. Systems map does not include data from designated HAP or BHAP programs, as the data could not distinguish between ES, TH, RRH, or PSH characteristics of each HAP or BHAP program. There were 2,239 entries from HAP or BHAP programs.
2. "HMIS Beds" represent the number of beds that were reported on the Housing Inventory Count (HIC) through the HMIS (i.e., HMIS participating beds). "Total Beds" represent the total number of beds reported on the HIC, including beds reported from databases other than HMIS (e.g., databases used by shelters for victims of domestic violence).
3. All percentages on this map represent the percent of persons that entered or exited from each type of program: ES, TH, RRH, and PSH (e.g., Out of the 2,700 entries in ES, 986 people, or 37%, came from a place not meant for human habitation).
4. In general, data that accounts for less than 4% of the total number of entries or exits per program is not graphically represented on this map, unless it was intentionally added to show significance (e.g., Out of the 303 people that entered the homeless system coming from an institution, 203 went to ES, 93 went to TH, 8 went to RRH and 1 to PSH. The low RRH and PSH entries are not graphically represented but they are included in the total calculations.)
5. Category Other II. Other Destinations (552) combines the following destination types in Data Element 3.12: Staying with friends or family (temporary tenure), Hotel or motel, Deceased, or Other.
